Hashtek 65t

Commercial Bubble Hash Extraction System

Designed and built for the professional hashmaker. Turnkey solution for bubble hash extraction. You only need 3 things to get started: water in, power and a drain hose for waste water. Designed to be used by a single operator this unit maximizes efficiency and daily throughput. \$60-150k revenue per day. Average payback period of 7 months compared to handwashing (see our ROI calculator for more information).

Description

- Turnkey ICE Water (bubble hash) Extraction Unit
- Patented tip-to-empty system for effortless emptying of biomass
- Sanitary stainless Steel Piping for recirculation, drain, fresh water and rinse water
- 7" Industrial LCD with advanced control options
- Hashtek's Proven Gentle Top-Down Agitation
- Interchangeable Paddle (includes ICE paddle)
- Sanitary 304 SS construction throughout
- Sealed Washdown safe Electric motor
- Includes VFD speed control with an upper limit of 60rpm
- Proprietary Hashtek Work Screen eliminating the need for 220u work bags
- Ergonomic Freeze Dryer Tray Holder
- Sanitary Butterfly Valves & Compression Fittings, no exposed threading
- CIP ready
- 2x sanitary pumps included (on demand water pump & recirculation pump)
- 65 Gallon Water Capacity in Agitation Vessel
- Includes 44 Gallon Collection Vessel
- Designed to be run by a single operator
- Custom Neoprene Insulation Jackets for Agitation and Collection Vessels are available as an add-on
- Gravity Drain for Trichome Rich Water, Sanitary pumps for filtered water
- Made In Canada, lifetime warranty on craftsmanship & lifetime support
- Fastest setup and takedown on the market
